M.B.S. Professional Series Mechanical Bull - 110VAC

Why 110VAC?

- 110VAC-20A grounded power outlets are more readily available
- 110VAC-20A grounded heavy duty male plugs for the power cord are also more readily available and inexpensive
- No need to hire an outside licensed electrician to run power for the unit
- Operating on 110VAC reduces safety hazards
- If you rent units to your end customers, the new 110VAC will be a more attractive option because there are no special power requirements
- It offers a more realistic bull riding experience as a result of the more powerful, robust 5HP variable frequency drive
- Can be operated on 110VAC-20A GFCI outlet providing the ultimate customer shock hazard safety

M.B.S. Features & Benefits

- Safety features ensure the rider falls off to the sides of the bull body and never over the bull head or tail-end of the bull body
- Optional built in start/stop switch wireless sensor automatically stops the ride when rider falls off the bull body
- Designed to stimulate real bull movements
- Control panel allows for manual control or 35 automated rides
- Automatic mode provides beginner, intermediate, and expert ride selections - operates from 8 to 90 seconds depending upon the level and time selected
- Bull body and horns are padded for added safety
- High quality air mattress with internal webbing producing stable quilted pillow style cushions of air
- Weather proof design for outdoor use
